

Here are some helpful hints on how to measure how much table skirting you will need for your table or tables as well as an easy to follow sizing chart for some of the most common skirting lengths to fit a wide assortment of tables and configurations:

*Table Skirting for Rectangular Tables:*

- *Measure all 4 sides of the table in inches (width of your table from side-to-side and the length of your table end-to-end)*
- *Divide by 12 to get the footage*
- *Multiply it by the quantity of tables you have*

*You should also measure how thick your tabletop is so that you can determine which type of table clip fits your table*

*Table Skirting for Round Tables:*

*To calculate the skirting length required for round tables, take the diameter of the table and multiply it by 3.14 and you will get the skirting length in feet. Then round that number off to the next 6" increment. An example would be for a 5' diameter table, multiply 5 x 3.14 to get 15.7'. Round that off to 16' and that is the length of the skirt you would need for a 5' round table.*

All of our table skirting is offered in standard heights of 29" as well as 42" for higher tables, etc. Custom heights for odd size tables, stages, etc, are also available to meet the varying needs of our customers! Lengths 13 feet and under are preferred for handling and cleaning while longer skirting is desired for higher tables, partitions, trade shows, fitting rooms or dressing rooms, DJ booths and stages. Custom lengths are also available at a standard height of 29" or whatever height you need! All custom orders must be called in to our sales department at 1-800-858-4255.

### TABLE SKIRTING SIZE CHART

- The table below is an expanded list of skirting lengths to fit a wide assortment of tables and configurations.
- For tables and configurations not listed, measure the perimeter and add 6" for the proper skirting length.
- To calculate the skirting length required for round tables, use the following formula:  

$$\frac{\text{Diameter} \times 3.14}{12} = \text{Skirting Length In Feet}$$
 (Round-Off To Next 6" Increment)
- Standard Snap-Drape Skirting is finished to 29" vertical height, to fit 30" high tables.
- Table heights will vary according to manufacturer.
- We recommend that skirting be one inch shorter than table or stage height to allow for proper hanging.

Skirt Length	Round Tables	Head Tables	Buffett Tables
12'		<div style="display: flex; justify-content: space-around;"> <div style="border: 1px solid black; padding: 2px;">30" x 72"</div> <div style="border: 1px solid black; padding: 2px;">18" x 72" 18" x 72"</div> </div>	
13'	48"	<div style="border: 1px solid black; padding: 2px;">30" x 96"</div>	
16'	60"
